DETAILED ACTION

1. This action is in response to applicant's amendment received on May 13, 2005.
2. The objection to the specification is withdrawn in view of the amendment.
3. The objection to claim 1 is withdrawn in view of the amendment.
4. The rejection to claim 1 under 35 USC § 112 is withdrawn in view of the amendment.
5. The text of those sections in Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

6. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 116 (FIG 26A).
7. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "41 ER" has been used to designate both a rib (FIG 10) and a rod (FIG 11).
8. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing

Art Unit: 3724

sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

9. Claim 1 is objected to because of the following informalities: "movable in direction" should be changed to - -movable in a direction- -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

10. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (6,272,961).

Regarding claim 1, Lee discloses a saw comprising: a base (50); a frame assembly (20) disposed on the base (50); a first rail (221) disposed on the frame assembly (20), the first rail (221) having a longitudinal axis; a table (30) slidably disposed on the first rail (221), the table (30) being movable in a direction substantially parallel to the longitudinal axis; a saw assembly (60) disposed on at least one of the base (50) and the frame assembly (20), the saw assembly (60) comprising a support assembly (23/63), a motor assembly (41) pivotably supported by the support assembly (23/63), the motor assembly (41) being pivotable about a pivot axis substantially parallel to the longitudinal axis, and a cutting wheel (42) driven by the motor assembly (41), the cutting wheel (42)

Art Unit: 3724

having a plane substantially parallel to the pivot axis; and a switch (45) electrically connected to the motor assembly (41) and disposed on the support assembly (23/63) so that, when the motor assembly (41) is pivoted about the pivot axis, the switch (45) remains stationary.

Regarding claim 2, Lee discloses the first rail (221) has a first end, and the table (30) is movable beyond the first end.

Regarding claim 3, Lee discloses the table (30) is movable beyond the base (50).

Regarding claim 4, Lee discloses the base (50) is formed as a tub.

Claim Rejections - 35 USC § 103

11. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee as applied to claim 1 above, and further in view of Klingens (2,691,398). Lee fails to disclose the frame is made of aluminum. However, Klingens discloses a saw wherein the frame is made of aluminum. Aluminum is a good material choice for a sturdy component such as a frame because it can be easily used in casting operations. See col. 2, lines 29-34. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use aluminum for the frame, as disclosed by Klingens, on the Lee device because aluminum can be easily used in casting operations.

Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

Art Unit: 3724

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
